

TRAINING CENTRE AED AND/OR TRAINING PACKAGES

AEDs (Automated External Defibrillators) can mean the difference between life and death.

Each year thousands of people in Ireland suffer a cardiac arrest in a public place. Ninety-five percent of people who have a sudden cardiac arrest die from it - most within minutes.

It can happen to anyone, anywhere, at anytime, killing without warning. Rapid treatment with CPR & an AED can be lifesaving.

Unfortunately, most of the time, the necessary life-saving equipment does not arrive in time. Now there is something you can do to improve the odds dramatically with a solution that is easy to use and affordable.

Make a bold statement: We value you. We value people. We value life. You only need the foresight to save one life. You've come this far, you're reading this.

Now make the decision to save a life and bring an AED to your business, club or community.

NAS will help you put an AED in place co-ordinate & deliver training & advise you on all matters. Contact NAS to find out about our Defibrillator and/or Training Package. Email training@nas.ie.
